

## MetPrep NanoFix Silicon Carbide System

### MetPrep NanoFix System

NanoDisc - PET backed SiC or metal backed cloth

NanoBase - Adhesive free plate with or without Magnoplate

Platen or Magnobase

MetPrep have expanded their Silicon Carbide range to include our new PET backed Silicon Carbide papers. The new NanoFix papers are a flexible alternative to our existing PSA or Plain paper versions.

The NanoFix system comprises an adhesive free plate the NanoBase, that attaches directly to your existing machine platen or Magnobase. This allows you to fix our NanoDisc Silicon Carbide discs directly to the base without the use of any adhesive.

Alternatively you can fix your NanoBase to a Magnoplate should you just want to use the NanoBase with the NanoDiscs and continue to use your existing Magnetic system for your cloths. The Magnoplate option is currently not available for 350 mm diameter option.

\*Quick & simple to use.

\*No messy adhesive to be concerned about.

\*Easy reuse of partially used papers.

\*Waterproof with no curling or wrinkling problems.

\*Available in 250 mm - 300 mm and 350 mm diameters.

\*Can be used with other foil based papers & metallic backed cloths if required
