**Our Zeiss microscope range**

Solutions for routine inspection through to fully automated analysis systems as well as custom solutions & upgrades – Our range includes stereo, upright & inverted compound, digital, confocal & automated slide scanning solutions for volume samples. Full portfolio of instruments available for demonstration at our applications laboratory or on site

Stemi & Discovery stereo microscope ranges

Axiolab, AxioScope, AxioImager, AxioVert & AxioObserver compound microscope

SmartZoom 5 digital microscope

LSM900 materials confocal for surface analysis

Custom build – 8” wafer microscope with automated stage and focus

**Our Zeiss workflow solutions and customised instruments**

Particle Analyzer for quality control in the area of component and oil cleanliness – systems allow automated filter paper analysis with measurement of particles down to 2µm. Particle Analyzer software supports the standards for cleanliness testing ISO 16232, VDA 19.1 and oil analysis DIN 51455, ISO 4406, ISO 4407, NAS 1638 and SAE AS 4059. With the system solutions from ZEISS, you ensure that the required microscope settings are always selected correctly thus providing reliable, reproducible results. By carrying out correlative particle analysis direct to SEM you expand the depth of information contained within your findings to include the results of both elemental and materials characterization.

Particle analysis workflow solution – light microscope location & measurement through to elemental SEM analysis

**Our Zeiss software**

Starting with our free of charge ZEN starter & Lite products the ZEN modular platform allows task handling from simple image capture to fully automated solutions capable of performing fully automated, programmable & tailored solutions that include 3D capability and machine learning based image analysis. Our solutions include modules for all materials requirements including:- Metallurgical analysis (grain, phase, porosity, coating, inclusion porosity, dendrite, de-carb, cast iron etc.

**INTRODUCING**

**The new family of XRF & LIBS hand held PMI analysis guns.**

The revolutionary Z-9 hand held LIBS offers the widest wavelength range (190nm - 950nm) available for a hand held unit. Argon purge optics for extra sensitivity and all in a compact and solid construction. With the ability to measure %Carbon in steels it is a revolutionary unit.

The X-550, the lightest, fastest, most articulate X-Ray gun ever made. Perfectly balanced to aid long period field use. Covering the elemental range of Mg -U and the ability to sort Al alloys in 1-2 seconds, environmental packages, and the optimised for low limits on tramp elements makes this unit a market leader.

**TIGHT SPOTS**  
**X-550**

Closest Competitor

There is a new leader in XRF for NDT/PMI and its name is X-550

**Cold Mounting Systems**

**KLEER-SET**  
Polyester resin/hardener system giving glass-clear mounts  
Curing time 40 mins.

Pack	Cat no.	Price
KLEER-SET FF Resin and Hardener 1kg	11 10 81	£43.50
KLEER-SET FF Resin and Hardener 5kg	11 10 82	£124.05

**TRI-HARD**  
A 3 part powder/liquid system giving exceptional hardness and low shrinkage for use in exacting applications where specimen edge retention is of paramount importance - Curing time 15 mins.

Pack	Cat no.	Price
TRI-HARD Kit - Regular (Powder, Liquid 1, Liquid 2) 1.5kg 500ml 1000ml	11 10 41	£171.45
TRI-HARD Kit - Large (Powder, Liquid 1, Liquid 2) 6kg 2000ml 4000ml	11 10 49	£659.35

**VARI-SET**  
Acrylic powder/liquid system offered in 2 different hardness levels. Powders can be mixed to obtain intermediate levels of hardness. Minimal shrinkage ensures ultimate edge preparation. Curing time - 10 mins.

Pack	Cat no.	Price
VARISET 10 Powder, soft, clear 1kg	11 10 27	£67.35
VARISET 20 Powder hard, green 1kg	11 10 28	£67.35

## MetPrep MAGNO System

The MetPrep MAGNO System allows for abrasive papers, Cameo and Galaxy Diamond abrasive discs, other diamond discs and Polishing cloths to be magnetically attached to the wheel of most grinding/polishing machines.

### MAGNOBASE

A magnetic substrate that is stuck to the wheel of a grinder/polisher to allow the use of steel backed discs. Only one is required per wheel.

200mm dia	EA	16 20 15	£20.20
254mm dia	EA	16 25 15	£25.30
305mm dia	EA	16 30 15	£32.60

### MAGNOPLANE

A steel disc with one side adhesive coated to attach multiple plain SiC papers; **for use on MAGNOBASE or NANOBASE**

200mm dia	5	13 90 13	£58.85
254mm dia	5	13 90 14	£78.85
305mm dia	5	13 90 16	£96.50

### MAGNOPLATE

A plain steel disc to provide a magnetic base for psa backed SiC papers and Polishing Cloths; **for use on MAGNOBASE or NANOBASE**

203mm dia	5	16 20 10	£35.50
254mm dia	5	16 25 10	£46.95
305mm dia	5	16 30 10	£54.40
305mm dia Stainless steel extra thick Magnoplate	EA	95006789	£24.60

## Zirconia Series Grinding Discs

Suitable for primary grinding of all materials to remove cutting marks and disturbed layer. The primary advantages of this material are its very long life and cool cutting characteristics when compared to SiC. PSA backed cloth discs **for use on MAGNOPLATES**

### DISCS 200mm diameter

### Cameo Silver & Gold Series

Fine grinding discs that deliver a constant stock removal rate. They can be used to replace many traditional grinding steps from P240 to P1200 where SiC papers are commonly used. This reduces the number of steps in your procedure resulting in considerable cost savings and waste reduction, and optimum flatness is achieved. The matrix pattern optimises the effectiveness of the MetPrep diamond suspension applied by ensuring continuous and even distribution during the grinding process.

Steel backed for use on MAGNOBASE or NANOBASE

#### CAMEO SILVER

For Medium Hard to very hard materials, >400HV

200mm dia	EA	12 20 10	£76.50
250mm dia	EA	12 25 10	£88.30
300mm dia	EA	12 30 10	£100.05

#### CAMEO GOLD

For soft ferrous and non-ferrous materials

200mm dia	EA	12 20 15	£76.50
250mm dia	EA	12 25 15	£88.30
300mm dia	EA	12 30 15	£100.05

#### IMPORTANT FEATURES

- Cost efficient - one Cameo disc replaces many SiC abrasive papers
- Patented surface profile ensures even stock removal
- The micro pools spread and recycle the diamond suspension which substantially reduces the usage compared with other systems
- The stock removal rates of Cameo discs are unsurpassed, giving short preparation times and a perfectly flat surface
- Cameo Discs can be used on both manual and automatic polishers

### Diamond Disc Series

Fixed diamond grinding discs.

Steel backed for use on MAGNOBASE or NANOBASE

Metal bonded diamond grinding discs, raised spot pattern ideal for the grinding of rocks and ceramics, with fast stock removal and long life.

**INTRODUCING** THE QPOL VIBRO

With a removable bowl and a magnetic base to allow easy cleaning and cloth changing, the QPOL Vibro makes its use in the laboratory simple and very effective..

Quiet operation, and with a lift up lid it is the ideal addition to the laboratory to get that perfect finish.

The QPOL Vibro is designed to create a deformation free surface. Ideal when preparing materials for EBSD (electron backscatte detection) in a repeatable and timely manner.

Those involved with nano identification and AFM (atomic force microscopy) will also find the improved surface quality advantageous.

Qcut 150 M/A

**INTRODUCING** NEW additions to the QCut family

The Qcut 150 M is a simple manual precision cutter capable of taking a 203mm blade like its more advanced companion the Qcut 150 A but without the auto & force controlled feed options.

Both cut off machines can be used for routine sectioning and grinding, or with the optional table attachment, they can be used as a safe and stable trim saw.

**INTRODUCING**

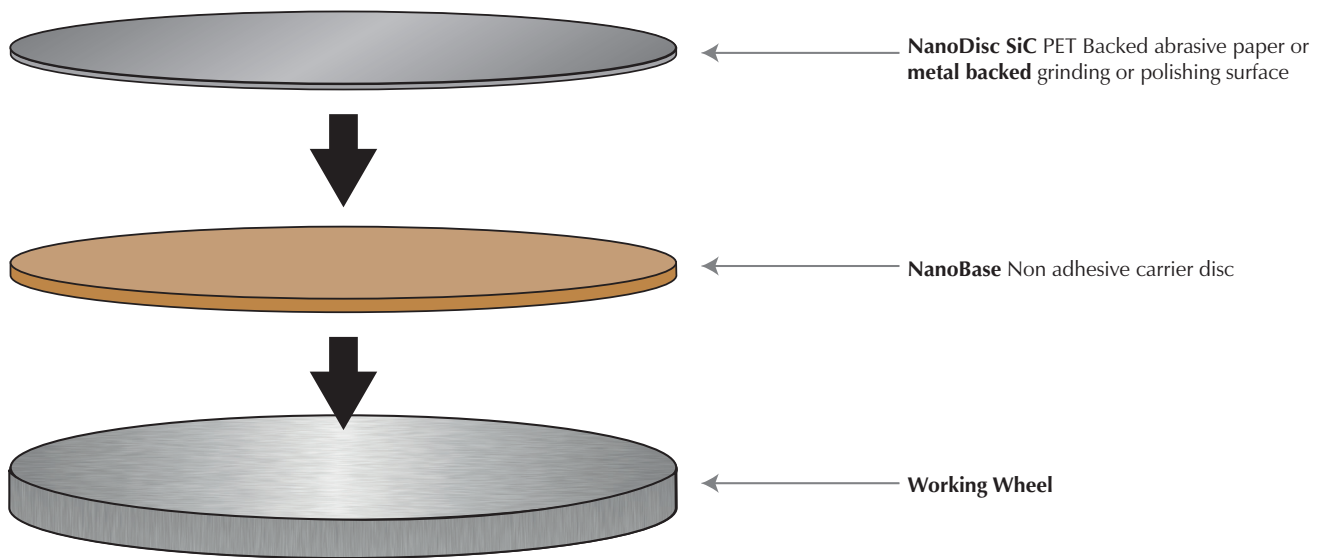

**MetPrep NanoFix System  
Premium Application adhesive free grinding**

Metprep have introduced our new NanoFix system which uses the latest advances in nano surface technology to bond the abrasive discs without the use of PSA backing. For use with Nanodisc SiC adhesive free grinding papers that have a PET backing which promotes a wrinkle free surface when laid down on the NanoBase.

Metal backed grinding and polishing surfaces may also be used. As an adhesive free system each component can be re-used as required. The high-performance NanoDisc abrasive papers may also be used on any similar system that utilises a suitable non-adhesive surface for fixation to the platen. Your existing grinder can easily be adapted to accept the new NanoFix system

**The MetPrep NanoFix System comprises:**

- **NanoBase** – reusable non-adhesive carrier disc
- **NanoDisc SiC** - PET backed Silicon Carbide Waterproof Abrasive Paper discs  
**Metal backed** Grinding Surfaces and Polishing Cloths

To adopt the MetPrep NanoFix System, the following new items are available:

# INTRODUCING

# THE QMOUNT

## The Qmount is a modern device for the light-curing-based mounting of materialographic samples.

The samples are placed in the device which is equipped with customized, powerful LED technology. The UV transparent mounting moulds are filled with the UV curing resin. The transparent sample can be removed within a very short time frame. A suction unit from the QATM portfolio can be connected to the device to increase work safety.

### PRODUCT ADVANTAGES

- UV mounting in the shortest possible time (60 seconds)
- Highly efficient, long-life LED technology
- Robust machine design
- Easy handling
- Connectable suction unit (optional)

## The Jim Ashby Laboratory and Technical Centre

### Everything under one roof

**Delivery** - Consumables next day in most cases; certain machines from stock.

**Service** - Regular maintenance and tailored service solutions for all equipment.

**Laboratory/Showroom** - Fully equipped Laboratory, including the ZEISS Application Suite.

**Roadshows** - Opportunities to experience our Quality products closer to home.
